APPLICATION DIVISION

Dear Sir:

Applicant respectfully requests that the following correction be made to the Corrected Filing Receipt for the above-referenced patent application.

Applicants have previously requested that the Filing Receipt for the above-referenced application be corrected and received a "Corrected Filing Receipt" on May 21, 1992. However, Applicants note that the serial number of the first listed priority document is now in error. A copy of the Filing Receipt with the error circled in red, a copy of page 1 of the specification containing the continuing data claimed by Applicant, and a copy of the Notification of the International Application Number and of the International Filing Date for the first listed priority document are enclosed for your convenience.

Cor FR Mailed

Please note that the priority claimed is for a PCT application. Applicants understand that the Patent Office data base only allows numeric characters in the continuing data field and that the series 01 followed by a six-digit number demotes a PCT application. Therefore it is Applicants belief that the correct reading of the priority data should be 01/001,746.

Please correct the continuing data as claimed by Applicant by deleting "THIS APPLN IS A CIP OF 01/111,746 03/14/91" and inserting in its place --THIS APPLN IS A CIP OF 01/001,746 03/14/91--.

Respectfully submitted,

Donna E. Scherer

This application is a continuation-in-part of PCT/US91/01746 filed March 14, 1991, now pending, and a continuation-in-part of USSN 07/494,106 filed on March 16, 1990, now pending, and a continuation-in-part of USSN 07/615,784 filed on November 14, 1990, now pending, which is a continuation-in-part of USSN 07/567,373 filed on August 13, 1990, now abandoned, and a continuation-in-part of the above-referenced USSN 07/494,106.

15 Technical Field

The present invention is directed to desaturase enzymes relevant to fatty acid synthesis in plants, enzymes, amino acid and nucleic acid sequences and methods related thereto, and novel plant entities and/or oils and methods related thereto.

INTRODUCTION

Background

Novel vegetable oils compositions and/or improved means to obtain or manipulate fatty acid compositions, from biosynthetic or natural plant sources, are needed. Depending
